

CERTIFICATE – Retirement

Heitz Kft., Hungary

Heitz Kft., Hungary has calculated their 2023 Scope 1 and Scope 2 greenhouse gas emissions. For this purpose, 34 emission certificates were retired.

The total amount of emissions was calculated by INDUS Holding AG. The retirement was carried out by FutureCamp Climate GmbH. The retirement was carried out in FutureCamp Climate GmbH's account in the Gold Standard Impact Registry.

34 t CO₂e*

The certificates originate from the **400 MW Solar Power Project at Bhadla, Rajasthan** (Gold Standard, GS 7071, Vintage 2021). The retirement of the certificates can be traced following this link:

<https://registry.goldstandard.org/batch-retirements/details/171439>

Heitz Kft., Hungary bears the costs for the certificates. In doing so, it makes a voluntary climate contribution for currently unavoidable GHG emissions.

*CO₂e (CO₂ equivalent) is the internationally accepted measurement for the climate effect of greenhouse- gases and corresponds to the climate effect of 1 t of CO₂.
